

## Getting started with Seesaw.

If using seesaw on a smartphone/tablet you can download the seesaw app in your app store. The icon looks like this:

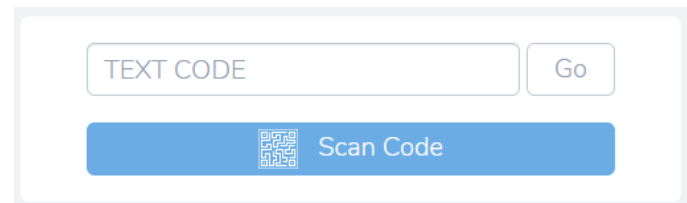

Or you can log in to seesaw online at <https://web.seesaw.me/>

When you click on the log in screen you need to click on 'I'm a student'

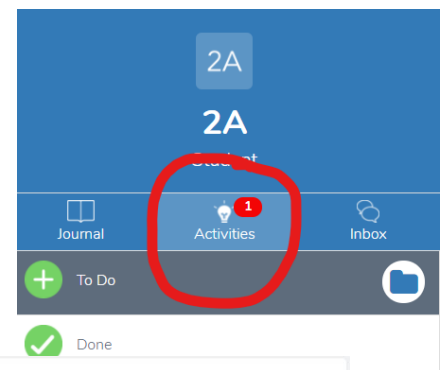

Once you have done this you can log in using either your camera to read the qr code or the text code on your child's letter. To use the qr code, click on scan code and hover your camera over the qr code. If using the text code, type the letters into the box and click 'GO'. You do not need to log in using an email address.

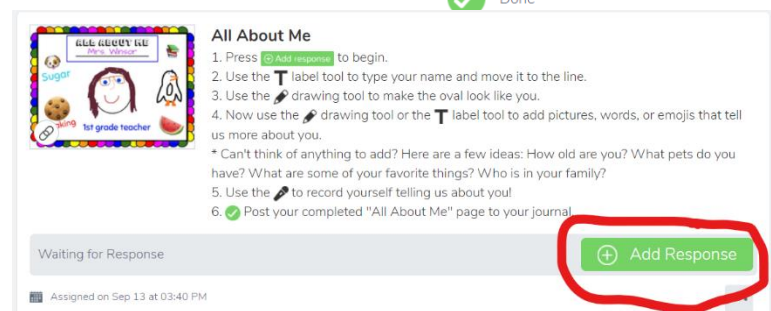

Once you have logged in you will see the homepage. Any completed work will show here.

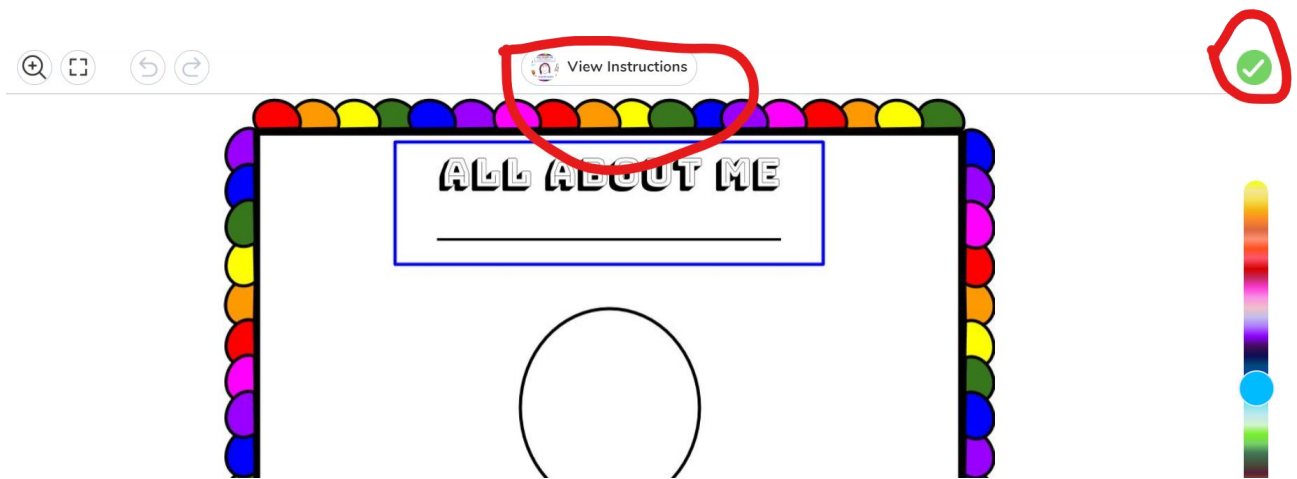

Activities set by your teacher will appear under the 'Activities' tab with the lightbulb icon on the righthand side of the screen.

When you have clicked on the Activities tab you will see all the activities that have been set. To complete an activity click on the green 'add response' button.

Once you are in the activity you can view the instructions again by clicking on the 'View instructions' tab at the top of the screen.

When you have completed an activity click on the green tick in the top right hand corner to submit your work.

I hope you find this useful.  
Miss Chilvers.
